# Interventions for Hospital Fall Risk Reduction.

## Learning Objectives:

1. Discuss the importance of implementing a multiteam system consisting of interprofessional core, coordinating, and contingency teams to support fall risk reduction in acute care.
2. Identify fall risk reduction interventions appropriate for all patients and those relevant for patients with specific fall risk factors.
3. Describe tools that can be used to assess a patient's mobility and the subsequent selection of appropriate safe patient handling strategies to be used in the patient's plan of care.

If you have questions about the webinar or registration, contact Gail Brondum at: [gail.brondum@unmc.edu](mailto:gail.brondum@unmc.edu) or phone: 402-559-8421.

*This program has been approved for 1.0 continuing education hours. Continuing Education Contact Hours awarded by Iowa Western Community College, Iowa Board of Nursing Provider #6.*
